EDUCATION

University of Toronto

Toronto, ON

Bachelor of Science in Computer Science

Sep. 2021 – Jun. 2025 (Expected)

- **Courses:** Programming, Linear Algebra, Software Design (**Java, React, Docker**), Numerical Algorithms for Computational Mathematics, Systems Programming (**C**), DSA (**C & Python**), Theory of Computation, Computer Organization, Machine Learning (**Python**), Artificial Intelligence (**PyTorch**), Databases, Operating Systems (**Linux**), HCI (**Figma**)
- **Awards:** UofT International Scholar Award (**\$7,500**), UofT Scholar Award (**\$100,000**), Dean's List Scholar
- **Certifications:** Deep Learning & Neural Networks (DeepLearning.AI)

EXPERIENCE

Software Engineer Intern

Sep. 2024 – Dec. 2024

Insply

- Spearheaded the development of an **AI-powered application assistant (React)** that delivered personalized, resume-tailored roadmaps through LLM scraping (**Exa**), **boosting application efficiency by 35%** for over 100 users.
- Engineered **robust backend integrations** using **Next.js, Supabase, Clerk, and LangChain**, reducing data retrieval latency by 25% and enabling real-time insights.
- Implemented a **browser automation feature**, similar to **OpenAI operator**, that enabled an **AI agent** to control the browser and autonomously apply to jobs, reducing manual effort by 40%.

Software Engineer Intern

May 2023 - Aug 2023

Maple Bit Services

- Spearheaded performance improvements in the company's POS system by engineering parallelized transaction workflows using **Python, C, and Linux** multi-threading, **reducing processing latency by over 30%**.
- Architected a **Redis-backed** in-memory caching layer to accelerate data access, minimizing backend read times and improving system responsiveness.
- Integrated **RESTful APIs** for transaction data, enhancing system performance and reducing fetch times by 25%.

Python Instructor

May 2024 – Aug. 2024

University of Toronto (Independent)

- Delivered engaging **Python** programming lessons (CSC108) in both virtual and in-person settings, leading to a **25% improvement in exam and assignment performance among 20+ students**.
- Provided **one-on-one mentoring** to 20+ students, reducing assignment turnaround time by 20% and enhancing problem-solving skills.

Project Manager

May 2020 – Sep. 2021

Silicon Fen Venture Fund

- Developed an **internal startup tracking dashboard** using **Python** and the **Google Sheets API** to track startup KPIs, mentor feedback, and funding usage, automating reporting workflows across 20+ teams.
- Led **technical coordination for 20 youth-led startup projects** by **developing scheduling systems** for 20+ industry seminars, weekly advising sessions, and mentor networking events, **accelerating startup progress velocity by 40%**.
- Engineered a **data-driven, resource allocation system** to manage and distribute **\$10,000+** in prototyping funds across 5 partner schools and local ventures, improving transparency and funding efficiency.

PROJECTS

Degree Design | *Android Studio, Java, Firebase, Git, Jira, JUnit, Mockito, Agile, Gradle*

- Created an Android app that **allows students to generate personalized degree timetables** based on completed and desired courses.
- Engineered an **authentication system** for secure timetable access and an admin panel for managing course information.
- Conducted functionality testing using **JUnit and Mockito** to identify and resolve bugs efficiently, reducing fault rate by 25%.

Android Assist | *Android Studio, Kotlin, Figma, Jira, Git, Android SDK, Gradle*

- Collaborated in a team of 5 to develop a mobile app for a B2C client that **simplifies access to essential mobile functions for immigrants** through a customized directory.
- Designed wireframes and icon mock-ups with an emphasis on a simplified user experience.
- Utilized **native Android APIs** to create compact versions of system settings, camera, photos, and contact apps.

TECHNICAL SKILLS

Languages: C, Python, Java, R, JavaScript, TypeScript, HTML, CSS, Racket, Haskell, Prolog, PostgreSQL, Kotlin, Terraform

Frameworks: React, Express, Node, React Native, Next, Vercel AI SDK, LangChain, LangGraph, Exa, CrewAI, Redis

Tools: AWS, MongoDB, Supabase, Clerk, Docker, Jira, Git, Figma, Android Studio, Firebase, Linux, Agile, HuggingFace

Libraries: Pandas, NumPy, Matplotlib, socket.io, scikit-learn, Crawl4AI, PyTorch, Tensorflow, Keras
